

Skill Set

Adobe Flex 2/3/4

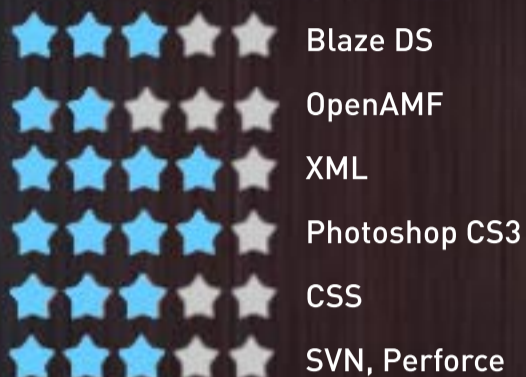

Flex Frameworks

ActionScript 3.0/2.0

Adobe AIR

Design Patterns

JSP/Servlets

Blaze DS

OpenAMF

XML

Photoshop CS3

CSS

SVN, Perforce

Technical Skills

- * Creating UI components using action script.
- * Configurable component architecture.
- * Complex charting applications.
- * Customizing Flex Charts.
- * On demand loading architecture.
- * Profiling of applications.
- * Mock-up / prototype creation.
- * Writing custom preloaders.
- * Ant build script for application building.
- * Complex data structure visualizations.
- * Timezone implementation on client side.

Objective

I have over five (5) years of experience in web/software engineering. During this time I have completed a wide variety of projects, performing duties that include senior level development, analysis and design, and client interaction. I have had the opportunity to work on many high profile projects, which required precise development guidelines and the highest standard of quality. The experience I have gained through working over the years has given me the ability to communicate at many different levels, both technically and personally. My advanced skill set focuses on the architecture and implementation of Adobe Flex, Flash projects. Most of the projects I have worked are in line with the industry standards, open APIs, and custom frameworks. Apart from my core responsibilities I have also conducted number of in-house training sessions on Adobe Flex.

Work Experience

Guavus Network System

Designation: Sr MTS I
<http://www.guavus.com>
October 2007 – till date
Gurgaon, India

Creating mock ups, architeching components, design and developement of UI components. Involving in the requirement discussions, estimating timeline, to assist with the modifications , new product development and improvements in existing framework and Developing Proof of Concept (POC) one part. Working on NetReflex 2.5G a Network data monitoring tool and BizReflex 1.0 a report generation tool.

Ness Technologies

Designation: Software Engineer
<http://www.ness.com/>
Mar 2006 – October 2007
Mumbai, India

Design and developement of UI components creating java classes and integrating them with UI components, enhancements in existing UI components, Bug fixing and fetature enhancements. Mentoring UI development team, often called upon to consult on flex technical problems that have eluded resolution by others. Worked for Dorado for their mortgage product chaseRELS.

Sathya Techologies

Designation:Software Engineer
November 2004 – March 2006
Hyderabad, India.

Creating Java web applications in MVC architecture using JSP, Servlets. Creating stand alone application using swings. Writing client side validations and server side data validations.Worked on SIS (Sales Information System) for the client Cormandal King.

SSI Technologies

Designation: Intern
March 2003 – November 2004
Kadapa, Hyderabad.

Mentoring engineering graduations in computer languages like C,C++ and Java. Guiding in their acadamic projects research and tracking timelines of their acadamic project developments.

Other activities

Active member and the top contributor atFlex India google group (2006-2007)
Speaker at Mumbai Flex User Group held on 5th August 2007. (<http://msimtiyaz.wordpress.com/2007/08/05/mfug-2>)

Hobbies

Photography and anything related to programming – coding, architechting, designing, performance tuning etc.
